

Model: IS-1101

Ideal for those having minimal space available and/or for those using their sauna solo, the Model IS-1101 has a footprint of only 9 sq.

Ft. The diminutive IS-1101 may be compact but it has the same luxurious features as larger models: Pure Infra Low EMR/Low EF, all-glass front wall, trimodal with valance lights, ceiling lighting with ceiling reading lights and color light therapy. "Lack of space" is no longer a limitation. This model can be installed into a corner of almost any room or integrated into a bathroom.

Model: IS-1102

This IR sauna has the same luxurious features as all S models: Pure Infra Low EMR/Low EF, all-glass front wall, trimodal lighting with valance light, ceiling reading lights and color light therapy.

It can be easily incorporated into an in-home workout area, master bath or even in the master bedroom.

Model: IS-1103

If you like to lie down in the sauna, this is the model for you.

This rectangular model comfortably seats three, but the 6' width also makes it comfortable for lying down. With the all-glass front, the room has an open, luxurious feel to it.

Model: IS-1104

Spaciousness with comfortable seating for four. By dropping in a bench insert to convert the two long benches into a U-shaped bench, you can seat up to five people, or have two people lying down at once.

Model: T8

The Traditional 8 Plus uses its Rapid Internal Heating System™ to efficiently heat the sauna, where it will then maintain the heat at a consistent temperature. A constant temperature is critical for the best sauna experience, nourishing your body and relaxing your muscles. The Traditional 8 Plus comes with new improved Extra Insulated Airflow System™ which takes the already efficient insulation from the rest of the Traditional series, and takes it further for the most consistent and efficient heated experience.

The solid wood exterior is made from premium hemlock wood and a safety glass casing, adding a touch of stunning beauty to your space while ensuring long-lasting durability. It's not just about functionality, it's about creating a welcoming atmosphere that makes you feel like you're relaxing in your own home. Enjoy a holistic wellness experience as you embark on a journey to detoxify your body, strengthen your immune system, improve circulation and embrace quality time.

We have prepared ready-made models of garden saunas so that you can easily choose the variant for yourself. These saunas differ in external façade, layouts, cubic capacity and glazing. We offer consultancy and professional sauna design, and the fruit of all our cooperation is the final assembly of your garden sauna in a wooden frame structure.

Garden saunas can be your private Spa regardless of the season or the weather outside. Properly designed, they will allow you to enjoy baths all year round, and the details that we take care of will complement each bath in the garden sauna and allow you to fully relax and rest.

Model: OS-1102

We have carefully selected wood of the highest quality alongside superb tempered insulating glass in the windows. The kit is self-assembly and is easy to erect after you have levelled the ground. The design can be configured to suit your needs so that the windows or door can be positioned as required.

Screws, nails, 2 sauna benches, backrest and aspen screens are included in the package, along with untreated tongue and groove boards for the roof, although roof cladding is not included. The choice of electric or wood burning stove is also up to you. The project is fun to undertake and requires no prior building experience.

You can configure the sauna as you require by moving the windows, although this also means the door will move as a result.

"Light & fresh" , perfectly describes this lovely and fully featured sauna. With windows on three sides, this compact 4 sqm sauna creates an inviting and open feeling for family or friends to spend a relaxing time chatting and enjoying the steam.

Model: OS-1103

A combined sauna with infrared and Finnish type of heating is an excellent choice for those who do not want to give preference to only one type of relaxing treatment. This version of the sauna is considered one of the most popular today and has a number of advantages:

1. Significant space savings, since not every person has the opportunity to place two saunas in one place.
2. Financial benefit. Turnkey installation of a Finnish sauna and an infrared cabin separately will be significantly more expensive than a combination in one building.
3. User benefit. In the combined infrared sauna, you have the choice of soft dry heat or hot steam.
